My portfolio: <https://my-portfolio-omega-six-86.vercel.app/>

SKILLS

- ❖ Java,C,Python
- ❖ Git, Git hub, CI/CD ,SCM
- ❖ DSA ,OS ,DBMS,Oops
- ❖ Microsoft Office Suit(Excel,Word,Powerpoint,Outlook,Teams) Data analysis

EDUCATION

- ❖ Btech CSE | UPES (July'24- June'28)
- ❖ XII(CBSE) | Loyola High School

EXPERIENCE

- ❖ Intern | Gram Sudhar Samiti (NGO)
(01 June 2025 – 30 July 2025)

Data Management Intern
Gram Sudhar Samiti (NGO) — Bhopal, Madhya Pradesh

- Managed, organized, and maintained organizational data and records to ensure accuracy and consistency.
- Assisted in data handling and basic analysis to support ongoing programs and reporting needs.

- ❖ App Developer Intern — LG Electronics

June 2026 – Completed

- Developed an enterprise Auto Reminder Sender application using Java and Spring Boot to automate employee task reminders and notifications.
- Built and integrated REST APIs with MySQL for employee, task, reminder, and notification management.
- Implemented backend features including authentication, role-based access, scheduled reminders, email notifications, and audit logging.
- Worked across the application stack and deployed the system using modern cloud and DevOps practices.

Tech: Java, Spring Boot, React, TypeScript, MySQL, REST APIs, JWT, Git, DevOps

ACADEMIC PROJECTS

- ❖ YouTube-Based Music Player Using Python

Built a Python music player that streams and plays audio directly from YouTube links.

Used Python libraries for audio extraction, playback, and user interaction.

- ❖ **Banking Management System** – A full-stack web application that enables customer account management, deposits, withdrawals, balance inquiries, and transaction tracking through secure APIs and database integration.

Tech Stack: Java, Spring Boot, MySQL, REST APIs, Hibernate/JPA, Git, GitHub, Postman, HTML, CSS, JavaScript (add React if you use it).

LINK:- <https://banking-frontend-ghyetuhel-ssinghayu98s-projects.vercel.app>

- ❖ **News Application (Team Project)**

Contributed to frontend-backend integration and API testing.

Assisted in deployment and configuration of frontend and backend services.

Helped troubleshoot deployment, API connectivity, and CORS-related issues.

Collaborated using Git and GitHub for version control.

- ❖ **LG Employee Reminder System**

Enterprise Task & Notification Platform

- Developed a full-stack employee reminder platform for task management, automated notifications, deadline tracking, and escalation management.
- Built secure backend services using Java, Spring Boot, Spring Security, JWT, Spring Data JPA, and MySQL.
- Implemented scheduled reminder jobs, email notifications, role-based access control, audit logging, reporting, and employee management.
- Built and deployed the frontend using React/TypeScript and integrated it with the Spring Boot REST APIs.

Tech: Java 21, Spring Boot, React, TypeScript, MySQL, JWT, Spring Security, REST APIs, Spring Mail, Git, Vercel
